Smart IP provides our clients with the most reliable wired and wireless network solutions in Canada. Smart IP's broad portfolio of products is designed to securely deliver Layer 2 connectivity, Layer 3 routing and Quality of Service, combined with Layer 4-7 content-aware intelligence.

Our network assessment services can isolate network deficiencies, pinpoint areas in your network requiring change, or upgrade before rolling out a VoIP Network.

Contact the **Smart IP Sales Team** for a complimentary consultation for your organization.

Why Smart IP Converged Voice and Data?

- One partner and one number to call for all your network services
- Wireless and wired LAN design and implementation
- Cabling, router, and firewall configurations and installations
- Total network security with advanced firewall and routing systems
- Reduced Total Cost of Ownership - resulting in more control and less reliance on vendors
- Remote monitoring and alarm notification; 99.999% uptime
- Prioritization of voice and data flow to maximize QoS

If your network is critical to your business then Smart IP is your best choice! Sharing data securely, reliably, and safely throughout your entire organization is easy with Smart IP.

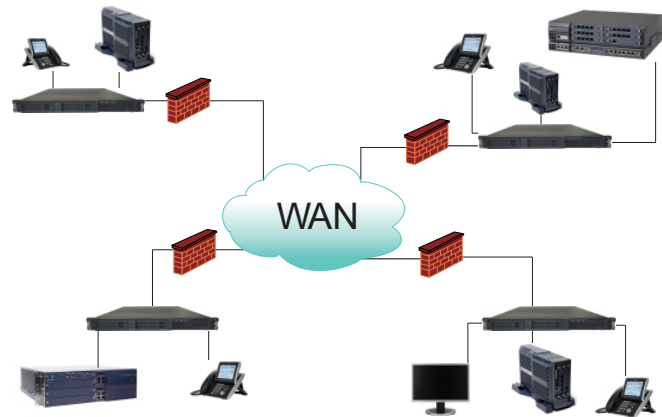

Converged Voice and Data

Security Portfolio - optimizes security for applications and services, including VoIP, SIP, wireless, and multimedia without affecting network performance and resiliency. Networks are protected and secured end-to-end from any infections or attacks that may disrupt the network performance. Includes: Secure Network Access Switch, Secure Routers, Switched Firewalls, Threat Protection Systems, VPN Gateways, and VPN Routers.

Ethernet Routing Switching - securely delivers Layer 2 and Layer 3 connectivity combined with Layer 4 through Layer 7 content-aware intelligence, regardless of the size of your organization.

Ethernet Switches - provide small and medium-sized businesses and large enterprise high-throughput networking at low ownership cost per port with high quality of service (QoS).

Extended Connectivity beyond your premise walls to the Public Network - Smart IP has partnered with a national carrier to provide our customers with a total end-to-end solution; offering services such as local and long distance voice services, high-performance internet connectivity, ISDN PRI service, and managed hosting.

Mobility - Smart IP solutions to keep you connected to customers, vendors, and employees anytime, anywhere, on any device. Smart IP offers a selection of mobility applications that will seamlessly connect your hand-held device and your laptop to the network, and a Mobility portfolio to extend the features and applications of Avaya and ShoreTel product lines.
